### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### Status

- 1) ☐ Responsive to communication(s) filed on \_\_\_\_.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

Art Unit: 1771

1. Applicant's election without traverse of Group II is acknowledged.

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 9-11, 13, 16-28 are rejected under 35 U.S.C. 102(b) as anticipated  
Smalley et al, WO 98/39250.

Smalley discloses a method of making carbon nanotubes comprising the steps of supplying a solid phase target which may comprise carbon particles and one or more Group VI or Group VIII transition metals which act as a catalyst. The target is vaporized by a laser beam. Smalley discloses an apparatus for performing the method steps. See page 10, lines 4-29. Another method of making carbon nanotubes is to supply carbon vapor to the end of a carbon nanotube. See page 11, lines 11 through page 12, line 10. This method corresponds to the method set forth in claims 18-22, 25-28. The length of the carbon nanotubes is increased by this method. The length of the tube equates to the data which is collected in claim 27 which is used to determine if the process should be continued, (depending upon the length desired in the nanotube). A template may be employed to form a pattern of nanotubes. See page 36, lines 14-27.

Art Unit: 1771

4. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Smalley et al. Smalley discloses a method of making nanorods as set forth above. Smalley differs from the claimed invention because, although Smalley does disclose that carbon particles may be used to make up the target, Smalley does not disclose the size of the particles. However, it would have been obvious to one of ordinary skill in the art at the time the invention was made to have selected the appropriate particle size through the process of routine experimentation which produced the optimum growth of carbon nanorods.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Elizabeth M. Cole whose telephone number is (703) 308-0037. The examiner may be reached between 6:30 AM and 6:00 PM Monday through Wednesday, and 6:30 AM and 2 PM on Thursday.

Mr. Terrel Morris, the examiner's supervisor, may be reached at (703) 308-2414.

Inquiries of a general nature may be directed to the Group Receptionist whose telephone number is (703) 308-0661.

The fax number for all official faxes is (703) 872-9306. The fax number for unofficial faxes is (703) 305-5436.
